Factfulness Jun 27 2022 INSTANT NEW YORK TIMES BESTSELLER “One of the most important books I’ve ever read—an indispensable guide to thinking clearly about the world.” – Bill Gates “Hans Rosling tells the story of ‘the secret silent miracle of human progress’ as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly.” –Melinda Gates “Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases.” - Former U.S. President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world’s population live in poverty; why the world’s population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don’t know what we don’t know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn’t mean there aren’t real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- “This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn’t enough. But I hope this book will be.” Hans Rosling, February 2017.

Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a “temporary nervous depression - a slight hysterical tendency”, a diagnosis common to women during that period

Have you ever looked around and wondered, "Why has everyone found love except me?" You're not the only one. Great relationships don't just appear in our lives—they're the culmination of a series of decisions, including whom to date, how to end it with the wrong person, and when to commit to the right one. But our brains often get in the way. We make poor decisions, which thwart us on our quest to find lasting love. Drawing from years of research, behavioral scientist turned dating coach Logan Ury reveals the hidden forces that cause those mistakes. But awareness on its own doesn't lead to results. You have to actually change your behavior. Ury shows you how. This "simple-to-use guide" (Lori Gottlieb, New York Times bestselling author of Maybe You Should Talk to Someone) focuses on a different decision in each chapter, incorporating insights from behavioral science, original research, and real-life stories. You'll learn: -What's holding you back in dating (and how to break the pattern) -What really matters in a long-term partner (and what really doesn't) -How to overcome the perils of online dating (and make the apps work for you) -How to meet more people in real life (while doing activities you love) -How to make dates fun again (so they stop feeling like job interviews) -Why "the spark" is a myth (but you'll find love anyway) This "data-driven" (Time), step-by-step guide to relationships, complete with hands-on exercises, is designed to transform your life. How to Not Die Alone will help you find, build, and keep the relationship of your dreams.

Attached Nov 28 2019 "Over a decade after its publication, one book on dating has people firmly in its grip." —The New York Times We already rely on science to tell us what to eat, when to exercise, and how long to sleep. Why not use science to help us improve our relationships? In this revolutionary book, psychiatrist and neuroscientist Dr. Amir Levine and Rachel Heller scientifically explain why some people seem to navigate relationships effortlessly, while others struggle. Discover how an understanding of adult attachment—the most advanced relationship science in existence today—can help us find and sustain love. Pioneered by psychologist John Bowlby in the 1950s, the field of attachment posits that each of us behaves in relationships in one of three distinct ways: • Anxious people are often preoccupied with their relationships and tend to worry about their partner's ability to love them back • Avoidant people equate intimacy with a loss of independence and constantly try to minimize closeness. • Secure people feel comfortable with intimacy and are usually warm and loving. Attached guides readers in determining what attachment style they and their mate (or potential mate) follow, offering a road map for building stronger, more fulfilling connections with the people they love.
