Search Engine Society Sep 30 2022 Search engines have become a key part of our everyday lives. Yet while much has been written about how to use search engines and how they can be improved, there has been comparatively little exploration of what the social and cultural effects might be. Like all technologies, search engines exist within a larger political, cultural, and economic environment. This volume aims to redress this balance and to address crucial questions such as: * How have search engines changed the way we organize our thoughts about the world, and how we work? * What are the 'search engine wars', what do they portend for the future of search, and who wins or loses? * To what extent does political control of search engines, or the political influence of search engines, affect how they are used, misused, and regulated? * Does the search engine help shape our identities and interactions with others, and what implications does this have for

privacy? Informed members of the information society must understand the social contexts in which search engines have been developed, what that development says about us as a society, and the role of the search engine in the global information environment. This book provides the perfect starting point.

Pay-per-click Search Engine Marketing Handbook Jan 23 2022 You've got products. You've got a website. You're ready to do business online. Now, how do you attract new customers? You'll find the answers in this book. In it, search engine advertising pioneers, Boris and Eugene Mordkovich, share their knowledge from the most basic information explaining how Pay-Per-Click works to why it is so extraordinarily effective, as well as offer detailed information on how to design a successful campaign, how to test concepts, determine what works, and fine-tune your campaigns to maximize the Return on Investment (ROI). It also delves into more advanced topics affecting

advertisers today, including contextual advertising (getting your website listed on thousands of websites without paying a penny), localized search (targeting a specific local area through search engines), and click fraud (how to protect yourself against it). The book also offers tips, techniques, and ideas contributed by 14 top experts in the industry.

Scientific Search Engine Marketing Jan 11 2021 Scientific Search Engine Marketing presents rational, scientific strategies for managing pay per click campaigns. It is based around two principle ideas: that split-testing is the only way to determine the most effective keywords, ads and web page copy; and that you should focus your pay per click budget on those keywords that generate the most profit per click or the lowest cost per conversion. This book shows the techniques that professional search engine marketers use to pick the best keywords and allocate budget accordingly.
