Model Checking Software Jul 18 2021 This book constitutes the refereed proceedings of the 16th International SPIN workshop on Model Checking Software, SPIN 2009, held in Grenoble, France, in June 2009. The 15 revised full papers presented together with 3 tool papers and 4 invited talks were carefully reviewed and selected from 41 submissions. The papers cover theoretical and algorithmic foundations as well as tools for software model checking by addressing theoretical advances and empirical evaluations related to state-space and path exploration techniques, as implemented in software verification tools.

US Policies in Central Asia Dec 23 2021 Democracy promotion, security and energy are the predominant themes of US policy in Central Asia after the Cold War. This book analyses how the Bush administration understood and pursued its interests in the Central Asia states, namely Kyrgyzstan, Tajikistan, Kazakhstan, Uzbekistan, Turkmenistan. It discusses the shift in US interests after September 11 and highlights key ideas, actors and processes that have been driving US policy in Central Asia. The author examines the similarities between the Bush and Obama administrations' attitudes towards the region, and he points to the inadequacy of the personality focused, partisan accounts that have all too often been deployed to describe the two presidential administrations. To understand US Central Asian policy, it is necessary to appreciate the factors behind its continuities as well as the legacies of the September 11 attacks. Using case studies on the war on terror, energy and democracy, drawing on personal interviews with Americans and Central Asians as well as the fairly recent releases of declassified and leaked US Government documents via sources like the Rumsfeld Papers and Wikileaks, the author argues that the US approached Central Asia as a non-unitary state with an ambiguous hierarchy of interests. Traditionally domestic issues could be internationalised and non-state actors were able to play significant roles. The actual relationships between its interests were neither as harmonious nor as conflicted as the administration and some of its critics claimed. Shedding new light on US relations with Central Asia, this book is of interest to scholars of Central Asia, US Politics and International Relations.

Perspectives of Systems Informatics Aug 26 2019 This volume contains the final proceedings of the 7th International Andrei Ershov Memorial Conference on Perspectives of System Informatics Akad- gorodok (Novosibirsk, Russia), June 15–19, 2009. PSI is a forum for academic and industrial researchers, developers and users working on topics relating to computer, software and information sciences. The conference serves to bridge the gaps between different communities whose search areas are covered by but not limited to foundations of programs and system development and analysis, programming methodology and software engineering, and information technologies. PSI 2009 was dedicated to the memory of a prominent scientist, academician Andrei Ershov (1931–1988), and to a significant date in the history of computer science in the country, namely, the 50th anniversary of the Programming - department founded by Andrei Ershov. Initially, the department was a part of the Institute of Mathematics and later, in 1964, it joined the newly established Computing Center of the Siberian Branch of the USSR Academy of Sciences. Andrei Ershov, who was responsible for forming the department, gathered a team of young graduates from leading Soviet universities. The first significant project of the department was aimed at the development of ALPHA system, an optimizing compiler for an extension of Algol 60 implemented on a Soviet computer M-20. Later, the researchers of the department created the Algib, Epsilon, Sigma, and Alpha-6 programming systems for the BESM-6 computers. The list of their achievements also includes the first Soviet time-sharing system AIST-0, the multi-language system BETA, research projects in artificial intelligence and parallel programming, integrated tools for text processing and publishing, and many others.

Time to React Mar 02 2020 In conflict-affected regions, delays in international response can have life or death consequences. The speed with which international organizations react to crises affects the prospects for communities to re-establish peace. Why then do some international organizations take longer than others to answer calls for intervention? To answer this question and explore options for reform, Time to React builds on contemporary scholarship with original data on response rates and interview evidence from 50 ambassadors across four leading organizations (AU, EU, OAS and OSCE). The explanation for variation in speed ultimately lies in core differences in institutional cultures across organizations. Although wealth and capabilities can strengthen a peace operation, it is the unspoken rules and social networks of peace and security committees at these organizations that dictate the pace with which an operation is established. This book offers a first analysis of the critical importance of and conditions shaping timeliness of crisis response by international organizations.

Canada and the Changing Arctic Apr 02 2020 Global warming has had a dramatic impact on the Arctic environment, including the ice melt that has opened previously ice-covered waterways. State and non-state actors who look to the region and its resources with varied agendas have started to pay attention. Do new geopolitical dynamics point to a competitive and inherently conflictual "race for resources"? Or will the Arctic become a region governed by mutual benefit, international law, and the achievement of a widening array of cooperative arrangements among interested states and Indigenous peoples? As an Arctic nation Canada is not immune to the consequences of these transformations. In Canada and the Changing Arctic: Sovereignty, Security, and Stewardship, the authors, all leading commentators on Arctic affairs, grapple with fundamental questions about how Canada should craft a responsible and effective Northern strategy. They outline diverse paths to achieving sovereignty, security, and stewardship in Canada's Arctic and in the broader circumpolar world. The changing Arctic region presents Canadians with daunting challenges and tremendous opportunities. This book will inspire continued debate on what Canada must do to protect its interests, project its values, and play a leadership role in the twenty-first-century Arctic. Forewords by Senator Hugh Segal and former Minister of Foreign Affairs and of National Defence Bill Graham.

National RV Trader, June 2009 Oct 1 2022

Harry Potter's World Wide Influence Aug 07 2020 The Harry Potter series forms a single epic story that has been published in nearly 70 languages, and has been examined in a large number of disciplines. This collection of essays contributes to the scholarly discourse that forms Potter Studies. These essays take on the consideration of Rowling's work as being worthy of study as a phenomenon and influence, as well as a work of literary value. They add genuine statistical information about the reasons for the books' popularity, consider their effects on child readers, and examine some deep-rooted reasons for their having been manipulated in American publishing, in film adaptations, in musical complements, and in their thirification in popular culture around the world. Some of these essays take on the critics of the books' religion and considerations of psychological, as well as philosophical good and evil, and well as some stylistic anomalies. The fact that scholars from China, Germany, Poland, Romania, and Israel, in addition to English-speaking nations, have felt compelled to examine these books in detail testifies in part to Harry Potter's world-wide influence.

AERO TRADER, JUNE 2009 Aug 31 2022

Development Challenges, South-South Solutions: June 2009 Issue Jul 30 2022 Development Challenges, South-South Solutions is the monthly e-newsletter of the United Nations Office for South-South Cooperation in UNDP (www.southerninnovator.org). It has been published every month since 2006. Its sister publication, Southern Innovator magazine, has been published since 2011.

Foot-tracks in New Zealand Nov 09 2020 Foot-tracks in New Zealand examines the development of walking tracks over two centuries, from the early 19th century to about 2011. The paperback version comes in two volumes but is otherwise identical to the electronic version. Page size: A4 Format: Paperback, 2 vol. ISBN: 0473191911, 9780473191917 Number of pages: 1000 About: Trails, Tracks, New Zealand, History, Recreation, Land access. Availability: By print on demand from The Fine Print Company, Waipukurau, Central Hawke's Bay, 4200, NZ.

Applications and Theory of Petri Nets Sep 27 2019 This book constitutes the refereed proceedings of the 30th International Conference on Applications and Theory of Petri Nets and Other Models of Concurrency, PETRI NETS 2009, held in Paris, France, in June 2009. The 19 revised papers classified as theory papers (13), application papers (1), and tool papers (5) were carefully reviewed and selected from 46 submissions. All current issues on research and development in the area of Petri nets and related models of concurrent systems are addressed, novel tools as well as substantial enhancements to existing tools are presented.

4th EOS Topical Meeting on Advanced Imaging Techniques Dec 31 2019

Geotechnical Risk and Safety Jun 04 2020 Communication of risks within a transparent and accountable framework is essential in view of increasing mobility and the complexity of the modern society and the field of geotechnical engineering does not form an exception. As a result, modern risk assessment and management are required in all aspects of geotechnical issues, such as planning, design, construction of geotechnical structures, mitigation of geo-hazards, management of large construction projects, maintenance of structures and life-cycle cost evaluation. This volume discusses: 1. Evaluation and control of uncertainties through investigation, design and construction of geotechnical structures; 2. Performance-based specifications, reliability based design and limit state design of geotechnical structures, and design code developments; 3. Risk assessment and management of geo-hazards, such as landslides, earthquakes, debris flow, etc.; 4. Risk management issues concerning large geotechnical construction projects; 5. Repair and maintenance strategies of geotechnical structures. Intended for researchers and practitioners in geotechnical, geological, infrastructure and construction engineering.

Combinatorial Pattern Matching Oct 21 2021 This book constitutes the refereed proceedings of the 20th Annual Symposium on Combinatorial Pattern Matching, CPM 2009, held in Lille, France in June 2009. The 27 revised full papers presented together with 3 invited talks were carefully reviewed and selected from 63 submissions. The papers address all areas related to combinatorial pattern matching and its applications, such as coding and data compression, computational biology, data mining, information retrieval, natural language processing, pattern recognition, string algorithms, string processing in databases, symbolic computing and text searching.

Exporting the European Convention on Human Rights Oct 28 2019 This book explores how the European Convention on Human Rights operates and influences on the global stage. The ECHR and its interpretation by the European Court of Human Rights (ECtHR) considerably echo in and outside Europe. To what degree has that influence translated into its norms, doctrines and methods of interpretation being exported into equivalent systems which also enact the protection of fundamental rights? This book answers that question by exploring the judicial dialogue of the ECHR system with comparable legal orders. Through a horizontal and multifaceted study of regional and global systems, the book identifies the impact of the ECHR within the confines of their jurisprudence to provide scholars in the field of international human rights law with an essential text. Discussing the extent to which the ECHR penetrates into the judicial production of the most affected legal systems, the book mostly focuses on the case law of the Court of Justice of the European Union, the Inter-American Court of Human Rights and the UN Human Rights Committee. It also investigates whether there is room for cross-fertilisation between them and finally, moves on to explore the legal consequences of the interplay of these mechanisms with the ECHR and what it means for the overall functioning of international human rights law.

WALNECK'S CLASSIC CYCLE TRADER, JUNE 2009 Nov 02 2022

Ephemeral Media Jun 24 2019 Ephemeral Media explores the practices, strategies and textual forms helping producers negotiate a fast-paced mediascape. Examining dynamics of brevity and evanescence in the television and new media environment, this book provides a new perspective on the transitory, and transitional, nature of screen culture in the early twenty-first century.

China, Europe and International Security May 16 2021 This book examines the roles played by China and Europe in the domain of international security in the 21st century. Bringing together Chinese and European expertise on the Sino-European Security relationship, this book positions Europe - both the EU and the major national actors - and China in a global security context. It offers not merely an elaboration of the theme of bilateral security relations, but also introduces a wider view on Europe and China as global security actors. The chapters cover four main themes: the perceptions of and actual relations between Europe and China as security actors; relations of China and Europe with third parties such as the US, Russia, and Iran; Europe and China as actors in multilateral security approaches; Europe and China as (potential) security actors in each other's technological domain or region. Given the increasingly prominent roles that both China and Europe play in international security as permanent members of the UN Security Council (in the European case, through the informal and partial representation of the UK and France), through their extensive global economic interests, and their important relations with the USA, this book provides a timely examination of the current state and future developments in the Sino-European relationship. This book will be of much interest to students of international security, Chinese politics, EU studies and IR in general.

Arbitration Law of Switzerland Jul 26 2019 Arbitration Law of Switzerland is a comprehensive review of the arbitration law and practice in Switzerland. Contents include: A discussion of the history and current legislation on arbitration and arbitration infrastructure and practice. Analysis of the current law and practice including an examination of the arbitration agreement, jurisdiction, arbitrability, the arbitral tribunal, conducting arbitration, the arbitral award and challenges and other actions against the award. A useful chapter on the recognition and enforcement of awards rendered both in Switzerland and in foreign jurisdictions and a comprehensive chapter covering the Swiss Rules of International Arbitration and the practices of the Swiss Chambers' Arbitration Institution.

European Welfare State Constitutions after the Financial Crisis Feb 10 2021 Hit by the European financial and economic crisis in 2008, several Member States of the European Monetary Union (EMU) were unable to refinance their public debt through the financial markets. As a result, they asked for financial assistance from international institutions and European financial assistance mechanisms. That assistance often came at a high price for citizens, cuts in pensions and social assistance, and controversial reforms in public healthcare. These far-reaching reforms were, in many cases, experienced as violations of people's human rights. National constitutional courts, the Court of Justice of the EU, and the European Court of Human Rights issued a series of rulings on the conformity of the reforms in social protection initiated during the Eurozone crisis. This book offers a holistic analysis of the specific reforms in social protection introduced during the European financial crisis and their implications for constitutional law. Focusing on the social reforms of nine European countries that were greatly affected by the financial crisis, the volume seeks to address the legacy of the financial crisis on the application of constitutional law and the welfare state. The book will act as a helpful tool to legal academics interested in the challenges of constitutional and social law initiated by financial assistance conditionality, to advocates in quest of sound legal bases for the protection of individuals affected by social security reforms, and to national and international judges who are confronted with cases that question the legality and legitimacy of the crisis-related reforms.

The Routledge International Handbook of Teacher and School Development Oct 09 2020 The contributions are authoritative and of high quality. This is an important resource. -The Teacher Trainer A seminal, 'state-of-the-art' critical review of teacher and school development which touches upon and discusses issues at both policy and practice levels.

The Drury's Gazette May 04 2020 For a limited time the pricing of The Drury's Gazette has been reduced. . . . enjoy the savings. The Drury's Gazette is a quarterly publication featuring an entirely new look while still publishing the

best of today's emerging poets and writers. Check out what Susan C. Barto our new media reviewer has to say on the latest books, movies and CDs. Susan C. Barto will share how her personal tragedy transformed her life and lead her to lose 175 pounds - keeping the weight off. It is never too late for anyone at any age to turn his or her life around so why not start today! The Drury's Gazette is a compilation of collected works by various individuals from around the globe. The Drury's Gazette also offers regular contest to reward editorial selected poets and writers. It's a great deal of fun for EVERYONE. We welcome new and established writers.

Applied Cryptography and Network Security Jun 16 2021 ACNS2009, the 7th International Conference on Applied Cryptography and Network Security, was held in Paris-Rocquencourt, France, June 2-5, 2009. ACNS '2009 was organized by the Ecole Normale Supérieure (ENS), the French National Center for Scientific Research (CNRS), and the French National Institute for Research in Computer Science and Control (INRIA), in cooperation with the International Association for Cryptologic Research (IACR). The General Chairs of the conference were Pierre-Alain Fouque and Damien Vergnaud. The conference received 150 submissions and each submission was assigned to at least three committee members. Submissions co-authored by members of the Program Committee were assigned to at least four committee members. Due to the large number of high-quality submissions, the review process was challenging and we are deeply grateful to the committee members and the external reviewers for their outstanding work. After meticulous deliberation, the Program Committee, which was chaired by Michel Abdalla and David Pointcheval, selected 32 submissions for presentation in the academic track and these are the articles that are included in this volume. Additionally, a few other submissions were selected for presentation in the non-archival industrial track. The best student paper was awarded to Ayman Jarrous for his paper "Secure Hamming Distance Based Computation and Its Applications," co-authored with Benny Pinkas. The review process was run using the iChair software, written by Thomas Baigneres and Matthieu Finiasz from EPFL, LASEC, Switzerland and we are indebted to them for letting us use their software. The program also included four invited talks in addition to the academic and industrial tracks.

Meeting of the GRDC Steering Committee May 28 2022

Mathematics and Computation in Music Jan 12 2021 This book constitutes the refereed proceedings of the Second International Conference on Mathematics and Computation in Music, MCM 2009, held in New Haven, CT, USA, in June 2009. The 26 revised full papers presented were carefully reviewed and selected from 38 submissions. The MCM conference is the flagship conference of the Society for Mathematics and Computation in Music. The papers deal with topics within applied mathematics, computational models, mathematical modelling and various further aspects of the theory of music. This year's conference is dedicated to the honor of John Clough whose research modeled the virtues of collaborative work across the disciplines.

Sustainable Growth and Resource Productivity Sep 07 2020 Written by international experts in their respective fields, Sustainable Growth and Resource Productivity provides a comprehensive overview of global issues of raw materials supply and resource use. It also introduces new views and perspectives on the sustainable growth of emerging economies and develops a rationale for a new resource economics. This book emphasises why resources are back on the agenda: firstly, because of their fundamental economic role in technological progress and long-term prosperity; secondly, because deficits in raw material markets are now intertwined with deficits in the financial markets; and, thirdly, because the sustainable management of natural resources is a crucial element in responses to new global challenges such as climate change. Sustainable Growth and Resource Productivity analyses raw materials supply and resource use in a global context. The contributions present state-of-the-art results and perspectives on the availability of resources and discuss factors such as limited supply, demand from emerging and other economies and the critical shortage of some materials – particularly some metals – that are essential inputs in many high-tech processes and may put certain industries at risk. Sustainable Growth and Resource Productivity sheds new light on the economics of sustainable growth. Linking the current financial crisis with stock market pricing and innovation dynamics, it argues for reforms in international macro-economic policies. It also critically discusses the implications of valuing labour productivity over capital and resource productivity and argues that policies favouring capital productivity will increase both social and economic sustainability. Further contributions are made on the business dimensions of material efficiency as well as on policy recommendations. The book examines the overall empirical trend towards decoupling resource use from economic growth. It undertakes a rigorous cross-country comparison and looks in more detail at the cases of Finland and Greece, as well as at emerging economies and their role in the global governance of natural resources. A key focus is placed on China, with discussion of recent findings regarding Chinese domestic policy on energy, climate and resources as well as on developing Chinese foreign policy in Africa. The book concludes with the posing of a new theory of resource economics: an emerging sub-discipline that puts resources at its heart but clearly aligns with other fields of economics, and transcends the borderlines of geology, geography, material science, recycling and waste, as well as elements of other social sciences. This important new book will be essential reading for economic researchers, governmental officials, businesses and NGOs with an interest in understanding the policy links to sustainable growth and in learning more about the emerging field of resource productivity.

Web Engineering Jan 24 2022 This book constitutes the refereed proceedings of the 9th International Conference on Web Engineering, ICWE 2009, held in San Sebastian, Spain in June 2009. The 22 revised full papers and 15 revised short papers presented together with 8 posters and 10 demonstration papers were carefully reviewed and selected from 90 submissions. The papers are organized in topical sections on accessibility and usability, component-based web engineering: portals and mashups, data and semantics, model-driven web engineering, navigation, process, planning and phases, quality, rich internet applications, search, testing, web services, SOA and REST, and web 2.0.

Combinatorial Optimization and Applications Feb 22 2022 This book constitutes the refereed proceedings of the Third International Conference on Combinatorial Optimization and Applications, COCOA 2009, held in Huangshan, China, in June 2009. The 50 revised full papers were carefully reviewed and selected from 103 submissions. The papers feature original research in the areas of combinatorial optimization - both theoretical issues and applications motivated by real-world problems thus showing convincingly the usefulness and efficiency of the algorithms discussed in a practical setting.

The Woman Behind the New Deal Mar 14 2021 "Kirstin Downey's lively, substantive and—dare I say—inspiring new biography of Perkins . . . not only illuminates Perkins' career but also deepens the known contradictions of Roosevelt's character." —Maureen Corrigan, NPR Fresh Air One of Franklin Delano Roosevelt's closest friends and the first female secretary of labor, Perkins capitalized on the president's political savvy and popularity to enact most of the Depression-era programs that are today considered essential parts of the country's social safety network.

Analytical and Stochastic Modeling Techniques and Applications Nov 29 2019 This book constitutes the refereed proceedings of the 16th International Conference on Analytical and Stochastic Modeling Techniques and Applications, ASMTA 2009, held in Madrid, Spain, in June 2009 in conjunction with ECMS 2009, the 23rd European Conference on Modeling and Simulation. The 27 revised full papers presented were carefully reviewed and selected from 55 submissions. The papers are organized in topical sections on telecommunication networks; wireless & mobile networks; simulation; queueing systems & distributions; queueing & scheduling in telecommunication networks; model checking & process algebra; performance & reliability analysis of various systems.

Multiple Classifier Systems Apr 14 2021 This book constitutes the refereed proceedings of the 8th International Workshop on Multiple Classifier Systems, MCS 2009, held in Reykjavik, Iceland, in June 2009. The 52 revised full papers presented together with 2 invited papers were carefully reviewed and selected from more than 70 initial submissions. The papers are organized in topical sections on ECOC boosting and bagging, MCS in remote sensing, unbalanced data and decision templates, stacked generalization and active learning, concept drift, missing values and random forest, SVM ensembles, fusion of graphics, concepts and categorical data, clustering, and finally theory, methods and applications of MCS.

Green Building with Concrete Dec 11 2020 With superior fire resistance, strength, and a long service life, concrete is the most widely used construction material in the world. A sustainable material, concrete is also easily and affordably reused and rehabilitated. The first book to provide an overview of sustainability and concrete, *Green Building with Concrete: Sustainable Design and Construction* is a comprehensive guide to the use of concrete in sustainable building.

XVI International Conference SIDT 2009, Milan 29-30 June 2009 - Transport Management and Land-use Effect in Presence of Unusual Demand Jun 28 2022

Logic, Language, Information and Computation Jul 06 2020 Edited in collaboration with FoLLI, the Association of Logic, Language and Information, this book constitutes the 4th volume of the FoLLI LNAI subline; containing the refereed proceedings of the 16th International Workshop on Logic, Language, Information and Computation, WoLLIC 2009, held in Tokyo, Japan, in June 2009. The 25 revised full papers presented together with six tutorials and invited talks were carefully reviewed and selected from 57 submissions. The papers cover some of the most active areas of research on the frontiers between computation, logic, and linguistics, with particular interest in cross-disciplinary topics. Typical areas of interest are: foundations of computing and programming; novel computation models and paradigms; broad notions of proof and belief; formal methods in software and hardware development; logical approach to natural language and reasoning; logics of programs, actions and resources; foundational aspects of information organization, search, flow, sharing, and protection.

Journal of Singing Jan 30 2020

One-Click Buy: June 2009 Silhouette Desire Aug 19 2021 One-Click Buy: June 2009 Silhouette Desire by Ann Major, Maureen Child, Sara Orwig, Olivia Gates, Maxine Sullivan released on Jun 1, 2009 is available now for purchase.

Coordination Models and Languages Sep 19 2021 This book constitutes the refereed proceedings of the 11th International Conference on Coordination Models and Languages, COORDINATION 2009, held in Lisbon, Portugal, in June 2009, as one of the federated conferences on Distributed Computing Techniques, DisCoTec 2009. The 14 revised full papers presented were carefully reviewed and selected from 61 submissions. The subject-matter is to explore the spectrum of languages, middleware, services, and algorithms that separate behavior from interaction, therefore increasing modularity, simplifying reasoning, and ultimately enhancing software development.

The Punjabis in British Columbia Apr 26 2022 In this richly detailed study, Kamala Nayar documents the social and cultural transformation of the Punjabi community in British Columbia. From their initial settlement in the rural Skeena region to the communities that later developed in larger urban centres, The Punjabis in British Columbia illustrates the complex and diverse experiences of an immigrant community that merits greater attention. Exploring themes of gender, employment, rural and urban migrant life, and the relationships between the Punjabis and surrounding First Nations and other immigrant groups, Nayar creates a portrait of a community in transition. Shedding light on the ways in which economic circumstances affect immigrant communities, Nayar presents findings from interviews conducted with over one hundred participants. She details the relocation of Punjabi populations from the Skeena region to British Columbia's lower mainland during the decline of the forestry and fishery industries, how their second migration changed their professional and personal lives, and how their history continues to shape the identities and experiences of Punjabis in Canada today. A nuanced look at the complexities of social and cultural adaptation, The Punjabis in British Columbia adds an essential perspective to what it means to be Canadian.

Symposia and Free Communications Nov 21 2021
