Casebook of Traumatic Injury Prevention Feb 20 2022 This casebook profiles exceptional traumatic injury prevention programs from all over the globe. Its detailed description and analysis employ a

multi-stage process of identifying, evaluating, and casing effective prevention practices. The case studies reflect how legislative and regulatory information impact prevention efforts and provide insight into how national centers for injury prevention and control inform prevention practices on countrywide levels. The authors work with outcome-based research criteria to select and develop their comprehensive and contextually aware profiles of the programs. All included case studies follow the BRIO approach (Background, Resources, Implementation, and Outcome) – a model designed to provide a consistent way of describing programs that have been evaluated and found to be exceptional practices. The scope of the Casebook ranges across: The challenge of traumatic injury prevention Sports and recreation-related traumatic injury prevention Fall-related traumatic injury prevention Road traffic-related traumatic injury prevention Traumatic injury prevention within complex systems In its recognition of traumatic injury prevention across the lifespan as a critical and complex public health challenge, the Casebook of Traumatic Injury Prevention promises to be an influential and authoritative resource for professionals and students in public health, safety, injury prevention, medicine, psychology, sociology, nursing, and engineering. Government agencies and institutions such as the Centers for Disease Control and Prevention (CDC), public health departments, and safety associations also would find the Casebook relevant to their work.

Blue Hotel Jul 16 2021 In 1987, leather-clad tourist Blanca Nul goes missing in small-town New Zealand. Local reporter Ray Moody, washed-up and over-imbibing, gets a scoop the foreigner modelled for a pornographic magazine. He chases the story but crashes his car and loses his job. A year to the day after she was reported missing, Blanca is mysteriously sighted a second time. Ray sees a chance to revisit the missing person story and revive his career. The doppelganger death is identified as local goth Amber Drake and labelled a suicide, but Ray is not convinced. He discovers Amber was a

risk-taker with a darker purpose. She frequented the notorious S&M club Blue Hotel where the rich and powerful engaged their fantasies in anonymity. As he searches for the real story, Ray will learn how desperate, damaged and lonely people from all walks of life can be, and that the truth is hard-won and painful. A gritty, gripping crime novel. 'Blue Hotel's wily, tangled narrative is pure enjoyment, and the tenderness of its damaged characters is deeply affecting.' Tim Rogers 'Dialogue so fast and caustic it doesn't leave prints at the scene.' Jock Serong

The Data Science Design Manual Jan 22 2022 This engaging and clearly written textbook/reference provides a must-have introduction to the rapidly emerging interdisciplinary field of data science. It focuses on the principles fundamental to becoming a good data scientist and the key skills needed to

build systems for collecting, analyzing, and interpreting data. The Data Science Design Manual is a source of practical insights that highlights what really matters in analyzing data, and provides an intuitive understanding of how these core concepts can be used. The book does not emphasize any particular programming language or suite of data-analysis tools, focusing instead on high-level discussion of important design principles. This easy-to-read text ideally serves the needs of undergraduate and early graduate students embarking on an “Introduction to Data Science” course. It reveals how this discipline sits at the intersection of statistics, computer science, and machine learning, with a distinct heft and character of its own. Practitioners in these and related fields will find this book perfect for self-study as well. Additional learning tools: Contains “War Stories,” offering perspectives on how data science applies in the real world Includes “Homework Problems,” providing a wide range of exercises and projects for self-study Provides a complete set of lecture slides and online video lectures at www.data-manual.com Provides “Take-Home Lessons,” emphasizing the big-picture concepts to learn from each chapter Recommends exciting “Kaggle Challenges” from the online platform Kaggle Highlights “False Starts,” revealing the subtle reasons why certain approaches fail Offers examples taken from the data science television show “The Quant Shop” (www.quant-shop.com)

Million Cars for Billion People Sep 29 2022 Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? *A Million Cars for a Billion People* delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.

Global Business Strategy Jun 14 2021 This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in

India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

Melatonin, Neuroprotective Agents and Antidepressant Therapy Aug 24 2019 This work is a guidebook for clinicians who are involved in treating depressive patients and also serves the research scientists who are working on the psychopharmacological mechanisms of antidepressant actions and

psychopathological mechanisms underlying mood disorders. Mood disorders such as major depressive disorder (MDD), bipolar disorder (BPD) and seasonal affective disorder (SAD) are the most disabling disorders that are among the most expensive of all medical illnesses. The pathophysiology of mood disorders is very complex and involves many mechanisms like circadian rhythm disruption, sleep abnormalities, melatonin rhythm abnormalities and alterations in melatonin receptor mechanisms, abnormalities in monoaminergic neurotransmitter mechanisms, glutamatergic release mechanisms, hippocampal neurogenesis, and abnormal immune and cytokine release mechanisms. Many antidepressants that are in clinical use today including the recently introduced novel agents like agomelatine or other antidepressants cause clinical remission by resynchronizing disrupted circadian rhythms and melatonin receptor functions, enhancing monoaminergic neurotransmission, promoting hippocampal neurogenesis, and regulating immune mechanisms. This book explains various etiological factors that are involved in the pathogenesis of mood disorders and the mechanisms of therapeutic actions of antidepressants including the recently introduced agomelatine and other antidepressants that exhibit rapid onset of action with greater efficacy and fewer side effects. .

Proceedings of Second International Conference on Electrical Systems, Technology and Information 2015 (ICESTI 2015) Oct 31 2022 This book includes the original, peer-reviewed research papers from the 2nd International Conference on Electrical Systems, Technology and Information (ICESTI 2015), held in September 2015 at Patra Jasa Resort & Villas Bali, Indonesia. Topics covered include: Mechatronics and Robotics, Circuits and Systems, Power and Energy Systems, Control and Industrial Automation, and Information Theory. It explores emerging technologies and their application in a broad range of engineering disciplines, including communication technologies and smart grids. It examines hybrid intelligent and knowledge-based control, embedded systems, and machine learning. It also presents emerging research and recent application in green energy system and storage. It discusses the role of electrical engineering in

biomedical, industrial and mechanical systems, as well as multimedia systems and applications, computer vision and image and signal processing. The primary objective of this series is to provide references for dissemination and discussion of the above topics. This volume is unique in that it includes work related to hybrid intelligent control and its applications. Engineers and researchers as well as teachers from academia and professionals in industry and government will gain valuable insights into interdisciplinary solutions in the field of emerging electrical technologies and its applications.

Capital, Interrupted Jul 24 2019 The central Gujarat region of western India is home to the entrepreneurial landowning Patel caste who have leveraged their rural dominance to become a powerful global diaspora of merchants, industrialists, and professionals. Investigating the Patels' intriguing ascent, Vinay Gidwani analyzes its broad implications for the nature of labor and capital worldwide. With the Patels as his central case, Gidwani interrogates established concepts of value,

development, and the relationship between capital and history. Capitalism, he argues, is not a frame of economic organization based on the smooth, consistent operation of a series of laws, but rather an assemblage of contingent and interrupted logics stitched together into the appearance of a *deus ex machina*. Following this line of thinking, Gidwani points to ways in which political economy might be freed of its lingering Eurocentrism, raises questions about the adequacy of postcolonial studies' critique of Marx and capitalism, and opens the possibility of situating capitalism as a geographically uneven social formation in which different normative or value-creating practices are imperfectly sutured together in ways that can equally impair and enable profit and accumulation. Both theoretically astute and empirically informed, *Capital, Interrupted* unsettles encrusted understandings of staple concepts within the human sciences such as hegemony, governmentality, caste, and agency and, ultimately, does nothing less than rethink the very constitution of capitalism. Vinay Gidwani is associate professor of geography and global studies at the University of Minnesota.

E.aT. Jan 10 2021 In *E.aT.*, Michael Equill takes his reader on a laughable ride whilst something not so funny surrounds about. It seems the main character, Tone, a black man (yes, BLM), goes through a series of horrendous situations at the betwixt of aliens, with Tone's gorgeous girlfriend Brianne at his side until CIA Agent Roy Ronalds, all five feet of him that is, steps in. As Tone is screened for his mental sanity, Ronalds gets wind of things and starts narrating the entire story onto his iPhone. And when Tone learns about what these aliens have been doing to humanity, it will drive you insane, but then Tone drives it sane again. In short, if you're looking for a riot to read about, try some of Equill's *E.aT.* and find the parallel dimension that aliens have been using against humans since almost the beginning. Let Tone help you with something good to eat.
