**Photographic Lighting Equipment** Nov 20 2021 From flashlights and top-of-the-line studio electronic flashes to light stands and battery/inverter packs, this all-encompassing survey evaluates the vast array of lighting and equipment options available to professional photographers. Beginning with a basic history of the role of lighting equipment and the interplay between advances in capture and lighting technologies, the emphasis then shifts to advances made within the past five years that have enabled photographers to consider more low-powered and cost effective options than ever before. In addition to identifying the wide range of gear currently on the market—as well as those photographers may devise on their own—this reference examines the pros and cons of the various technologies and provides suggestions for their most practical use. Photographs of the equipment surveyed as well as real-life images created with the different pieces of equipment are interspersed throughout the text. Other helpful hints include tips for maximizing versatility, investment in each piece of equipment, and a "Top-Ten Must-Have List."

**Outdoor Flash Photography** Jul 17 2021 Maximizing the power of your camera's flash is difficult enough in a studio set-up, but outdoors literally presents a whole new world of challenges. John Gerlach and Barbara Eddy have taken the most asked about subject from their renowned photography workshops and turned it into this guidebook that is sure to inspire your next outdoor shoot, while also saving you time and frustration. Outdoor Flash Photography covers a range of practices from portrait to landscape, including unique strategies that the authors have pioneered through 40 years in the field. Mastering the use of multiple flashes to freeze action is shown through one of most challenging subjects in nature, hummingbirds in flight. This book will benefit photographers of all experience levels who are eager to evolve their outdoor photography and get the most out of their

equipment.

**The New Nikon Compendium** Mar 13 2021 Presenting the thoroughly revised, fully illustrated edition of The Nikon Compendium, updated by the technical editor of Nikon Owner magazine to include all the new Nikon cameras, lenses, and accessories. This is what Nikon enthusiasts have eagerly awaited: the most complete Nikon reference book ever. At almost double the length of the original, the guide describes virtually every Nikon camera ever produced, right up to the wide variety of popular digital models. It aids identification, offers user-friendly tips, explains what system fits with which camera, and discusses what limitations occur when equipment from one generation is married to items from another. Professional and amateur photographers, as well as enthusiasts, collectors, and retailers will want this on their bookshelves.

**Speedlights & Speedlites** Dec 10 2020 Canon Speedlites and Nikon Speedlights are small, off-camera flashguns that can provide big results - if you know how to use them properly.

Acclaimed Boston photographers Lou Jones, Bob Keenan and Steve Ostrowski guide you through the technical and creative aspects of how to get the most out of these powerful tools in this indispensable guide, packed full of inspirational images and comprehensive diagrams of the lighting set ups used to capture them. They are significantly more advanced, lighter and considerably cheaper than a standard flashgun, and have many advantages. They are small (and cheap) enough that a number can be carried in your kit, and they can be used in combination, triggered wirelessly. They use through-the-lens (TTL) metering, which allows you to use the in-camera LCD and histograms to calculate the required power/direction, rather than having to use a light meter or trial and error. They use proprietary, dedicated technology (from Canon and Nikon) that means there are no compatibility issues. Getting the most out of them, however, remains a mystery - most photographers still just use their speedlights in the same way as a standard flash gun. This is where this book comes in.
