Market Infrastructure Planning Aug 05 2020 This is the third manual on market infrastructure; it highlights the need for improved planning and decision-making to ensure successful market investments. The guide identifies the key steps in deciding on whether and how to invest in market infrastructure and highlights the steps to be taken to determine the size, location and operations of markets. The guide will be of interest to economists and planners in ministries of agriculture and of urban development as well as city and local authorities. Development practitioners will also find the guide of interest.

Principles and Practices of Small- and Medium-scale Fruit Juice Processing Aug 24 2019 While large-scale juice processing is the subject of many textbooks, this publication aims at the gap in information regarding juice processing at the small-and medium-scale agro-industry level. It presents technical and economic information designed to address issues affecting medium-size juice processors in developing countries.

Zero Tillage Development in Tropical Brazil Jun 22 2019 Conservation Agriculture is based on soil conservation techniques and the sustainable use of natural resources to increase productivity levels. This case study describes the introduction and promotion of the 'zero tillage' system in a tropical area of Brazil.

The publication has been developed as teaching material for agricultural students and practitioners, and it will also be of interest to all those involved in the promotion of conservation agriculture.

Rural-urban Marketing Linkages Sep 05 2020 By 2030, 60 percent of the world's population are expected to be living in urban areas. Population growth is not solely in larger metropolitan centres - the mega cities. The numbers of small and intermediate-sized urban centres are also increasing and have an important role as links in the marketing system. This guide provides a simplified aid to understanding the physical implications of marketing linkages, based on a regional planning approach. The guide provides a simple planning methodology and framework that focuses on the issue of linking farmers to market outlets for their produce particularly identifying their marketing infrastructure needs. The users of the guide are likely to be at national, provincial or district levels and could include planners and engineers in ministries and departments of public works and transport, planning and marketing officers in ministries and departments of agriculture, local authority officers in planning, commerce and marketing departments and local authorities, communities, farmer groups and voluntary organizations, concerned to understand marketing constraints and with ensuring that rural producers have better access to markets for their products.

Rural Transport of Food Products in Latin America and the Caribbean Dec 09 2020 The agrifood transport sector in Latin America and the Caribbean is a key component of the food supply chain, making a significant contribution to gross domestic product in these countries. Well-developed, efficient food transport systems are crucial to the survival of thousands of people, and pivotal to the success or failure of key economic sectors such as agriculture and other major national and international commercial activities. This publication presents a detailed study of problems encountered, covering seventeen countries. The study focuses primarily on stumbling-blocks faced by small farmers, and suggests possible policy and programme interventions to improve the situation in the neediest areas, with repercussions for the population as a whole. (Also published in Spanish)

Food Into Cities Dec 29 2019 The rapid growth of African cities means they have a great challenge in ensuring an adequate supply of food to satisfy their nutritional needs in terms of quantity, variety and taste, at accessible/affordable prices. Food supply and distribution systems (FSDS), whether formal or informal, are a key element. An efficient FSDS can increase the availability of food to the urban consumer, and at the same time increase the revenues of both traders and producers. However, there are a number of constraints that impede the efficiency of FSDS and these are discussed in the papers in this Bulletin that address the whole issue of food supply and food security. They are addressed towards urban managers and planners together with professionals and researchers concerned with urban food security.

NASA Tech Brief Sep 29 2022

Food Engineering, Quality and Competitiveness in Small Food Industry Systems with Emphasis on Latin America and the Caribbean Jun 02 2020 This publication sets out a detailed systems analysis approach to the small and medium agro-food industries sector in Latin America and the Caribbean region, in order to promote food safety and quality as well as enterprise productivity and competitiveness. The issues are discussed from food engineering and technology perspectives, in light of the complex issues faced by small food industries in the current trading system.

Manuals Combined: U.S. Navy Diving Manual Revision 7 (1 December 2016); A Navy Diving Supervisor's Guide for Safe and Productive Diving Operations; and Guidance For Diving In Contaminated Waters Oct 19 2021 Over 1,000 total pages INTRODUCTION 1-1.1 Purpose. This chapter provides a general history of the development of military diving operations. 1-1.2 Scope. This chapter outlines the hard work and dedication of a number of individuals who were pioneers in the development of diving technology. As with any endeavor, it is important to build on the discoveries of our predecessors and not repeat mistakes of the past. 1-1.3 Role of the U.S. Navy. The U.S. Navy is a leader in the development of modern diving and underwater operations. The general requirements of national defense and the specific requirements of underwater reconnaissance, demolition, ordnance disposal, construction, ship maintenance, search, rescue and salvage operations repeatedly give impetus to training and development. Navy diving is no longer limited to tactical combat operations, wartime salvage, and submarine sinkings. Fleet diving has become increasingly important and diversified since World War II. A major part of the diving mission is inspecting and repairing naval vessels to minimize downtime and the need for dry-docking. Other aspects of fleet diving include recovering practice and research torpedoes, installing and repairing underwater electronic arrays, underwater construction, and locating and recovering downed aircraft.

Monthly Catalog of United States Government Publications Mar 24 2022 Lists all publications issued in 1941-46 received into the Library of the Public Documents Division too late for inclusion in the current Monthly catalog and certain publications received in 1947 which were declassified, etc.

Testing and Evaluation of Agricultural Machinery and Equipment Sep 25 2019 This bulletin provides principles, practices and procedures for testing machines and also determines aspects of a machine's performance that can be evaluated. It is directed towards those involved in the evaluation of machinery, and primarily towards users on small farms. Evaluation of farm equipment may be appropriate at any stage in its development, from first prototype to batch and series production.
