Foundations of Private Law Apr 13 2021 *Foundations of Private Law* is a treatise on the Western law of property, contract, tort and unjust enrichment in both common law and civil law systems. It describes the doctrines that govern these fields of law and identifies principles that can explain both the similarities and differences between them. The thesis of the book is that underlying these fields of law are common principles, and that these principles can be used to explain the history and development of these areas. These underlying common principles are matters of common sense, which were given their archetypal expression by older jurists who wrote in the Aristotelian tradition. These principles shaped the development of Western law but can resolve legal problems which these older writers did not confront.

The Commercial Real Estate Revolution Oct 08 2020 As it currently operates, the commercial real estate construction industry is a disaster full of built-in waste. Seventy-percent of all projects end over budget and late. The buildingSMART Alliance estimates that up to fifty-percent of the process is consumed in waste. Almost every project includes massive hidden taxes in the form of delays, cost overruns, poor quality, and work that has to be redone. Building new structures is a fragmented, adversarial process that commonly results in dissatisfied customers and frequently ends in disappointment, bitterness, and even litigation. The industry must change—for its own good and that of its customers. But while the industry has tried to reform itself, it can't do it alone. Real change can only come from business owners and executives who refuse to continue paying for a dysfunctional system and demand a new way of doing business. The Commercial Real Estate Revolution is a bold manifesto for change from the Mindshift consortium—a group of top commercial real estate industry leaders who are

fed up with a system that simply doesn't work. The book explains how business leaders can implement nine principles for any project that will dramatically cut costs, end delays, create better buildings, and force the industry into real reform. The Commercial Real Estate Revolution offers a radically new way of doing business—a beginning-to-end, trust-based methodology that transforms the building process from top to bottom. Based on unifying principles and a common framework that meets the needs of all stakeholders, this new system can reform and remake commercial construction into an industry we're proud to be a part of. If you're one of the millions of hardcore cynics who work in commercial construction, you probably think this sounds like pie in the sky. But this is no magic bullet; it's a call for real reform. If you're an industry professional who's sick of letting down clients or an owner who's sick of cost overruns and endless delays, The Commercial Real Estate Revolution offers a blueprint for fixing a broken industry.
