Why We Drive Jun 18 2021 A brilliant and defiant celebration of driving as a unique pathway of human freedom, by "one of the most influential thinkers of our time" (Sunday Times) "Why We Drive weaves philosophers, thinkers, and scientific research with shade-tree mechanics and racers to defend our right to independence, making the case that freedom of motion is essential to who we are as a species. ... We hope you'll read it." —Road & Track Once we were drivers, the open road alive with autonomy, adventure, danger, trust, and speed. Today we are as likely to be in the back seat of an Uber as behind the wheel ourselves. Tech giants are hurling us toward a shiny, happy “self-driving” future, selling utopia but equally keen to advertise to a captive audience strapped into another expensive device. Are we destined, then, to become passengers, not drivers? *Why We Drive* reveals that much more may be at stake than we might think. Ten years ago, in the New York Times bestselling *Shop Class as Soulcraft*, philosopher-mechanic Matthew B. Crawford—a University of Chicago PhD who owned his own motorcycle shop—made a revolutionary case for manual labor, one that ran headlong against the pretensions of white-collar office work. Now, using driving as a window through which to view the broader changes wrought by technology on all aspects of contemporary life, Crawford investigates the driver's seat as one of the few remaining domains of skill, exploration, play—and freedom. Blending philosophy and hands-on storytelling, Crawford grounds the narrative in his own experience in the garage and behind the wheel, recounting his decade-long restoration of a vintage Volkswagen as well as his journeys to thriving automotive subcultures across the country. Crawford leads us on an irreverent but deeply considered inquiry into the power of faceless bureaucracies, the importance of questioning mindless rules, and the battle for democratic self-determination against the surveillance capitalists. A meditation on the competence of ordinary people, *Why We Drive* explores the genius of our everyday practices on the road, the rewards of “folk engineering,” and the existential value of occasionally being scared shitless. Witty and ingenious throughout, *Why We Drive* is a rebellious and daring celebration of the irrepressible human spirit.

How to Drive a Dragon Crazy Jul 08 2020 Sanity is overrated in this “captivating, funny, exciting” fantasy adventure from the New York Times bestselling author of the *Scarred Earth Saga* (Smexy Books). Some things never go away, like vile enemies, bad ale, and annoying kin. But I thought I was finished with the one dragon I'd have done anything for: Éibhear the Blue, a big, gorgeous, blue-haired beast who thinks the world belongs to him. The world and, apparently, me. So if Éibhear wants to play the caring hero and travel into the most forsaken of Gods forsaken lands to protect the one woman who doesn't need it—namely me—I'll let him. Because while I'm trying to fulfill a ridiculous quest for a pushy god, I'm going to draw this overconfident warlord much too close, rekindle his fires, and enjoy every minute of his delicious defeat . . . Praise for the *Dragon Kin Series* “Aiken's patented mix of bloodthirsty action, crazy scenarios and hilarious dialogue have made this series a truly unique pleasure.”—RT Book Reviews (4½ Stars) “A chest thumping, mead-hall rocking, enemy slaying brawl of a good book.”—All Things Urban Fantasy “Laugh-out-loud funny—I loved it!”—Thea Harrison, New York Times bestselling author “A hot, hot series.” --Library Journal

Drive Aug 28 2019 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.
