A survey of examination: malpractice among secondary school students - Causes, effects and solutions May 17 2021 Scientific Study from the year 2010 in the subject Pedagogy - Job Education, Occupational Training, Further Education, grade: 1.0, Bowen University, language: English, abstract: This research was carried out to investigate examination malpractice among secondary school students in Mushin Local Government area in Lagos State. The project highlights the causes of examination malpractice among secondary school students, the effect of examination malpractice and solution to examination malpractice in secondary schools. In this research work, a sample of twenty (20) teachers and one hundred (100) students were collected by means of simple random sampling techniques from five secondary schools in Mushin Local Government. The research instrument used for the study was the teacher's and student's perception questionnaire which was validated by the supervisor and used for the collection of data from the respondents. The data collected from respondents were analyzed with distribution tables and simple percentage. At the end of the analysis the study revealed the major reasons for examination malpractice which include parental pressure for good grades, value attached to certificate and so on. The study further recommend that parent should not put pressure on their children for good grades. Also emphasis should not be lay on certificates.

Secondary Data in Mixed Methods Research Jan 25 2022 Secondary Data in Mixed Methods Research by Daphne C. Watkins, the latest contribution to the Mixed Methods Research Series, offers unique and necessary instruction in this growing topic. With the increasing amount of secondary data available through journals and repositories, researchers have a trove of sources for new investigations at their fingertips, but few books to guide them. This brief text provides readers with a step-by-step procedure for incorporating secondary data into various mixed methods research designs, as well as

identifying key characteristics of existing datasets that make them good candidates for mixed methods projects and giving ideas for new uses of secondary data. Introductory chapters help the reader understand the “what” and “why” of secondary data. Subsequent chapters address the use of secondary data in convergent, exploratory sequential, explanatory sequential, and other complex research designs. The final chapters delve into writing and reporting on projects before, during, and after the project. Quotes throughout the chapter help readers remember key bits of knowledge, while learning objectives and summaries in each chapter structure the reading experience. Application questions at the end of each chapter help readers recall information and apply it to their own research projects. By emphasizing how to use existing qualitative and quantitative datasets in mixed methods research, *Secondary Data in Mixed Methods Research* will help readers answer new and ongoing questions in social science research.

Salesman Joe Jan 13 2021 The samurai warrior hones his skill to the point of perfection. If he does not, the consequences are dire. It is a matter of life and death. In most cases, the sales professional faces a similar battle with the same consequences - not only for survival, but for prosperity. Therefore it makes sense to understand the mind-set and modus operandi of the warrior to be successful in sales. Actions that must be done when faced with an adversary: • The preparation • How to engage the 'enemy' • Choosing the correct weapons • Closing the deal (kill) Perhaps more important is the way in which the warrior (and the sales professional) executes the task: • Our code of ethics • The responsibility of being an expert • Finding the 'middle way' • Operate in harmony Part II of *Salesman Joe* challenges the status quo in the sales environment as it is practiced today. The pitfalls of entrepreneurship are discussed as well as the role of senior management. Titles, women in sales, and sales training are placed under the magnifying glass. The age old issue of sales and marketing (horse/cart, chicken/egg) is revised. Ultimately, becoming your own best friend is the sales professional's biggest challenge. "The business world of today, through examples like the Enron scenario, has surely shown that "Situation Ethics" is the standard. *Salesman Joe* is a counter-culture writing that will not only reinforce the aspects of approaching your profession with solid ethics, but it will reflect on the blessings and rewards that come from that very same approach".

Development of a Prototype Self-assessment Program in Support of Soldier Competency Assessment Jun 05 2020 "Soldiers in the 21st century must possess the knowledge, skills, and other attributes to perform effectively in complex technical, information-rich environments. This study, *Development of a Prototype Self-Assessment Program in Support of Soldier Competency Assessment*, was conducted as a counterpart to the U.S. Army Research Institute for the Behavioral and Social Sciences' (ARI) Performance Measures for 21st Century Soldier Assessment (PerformM21). PerformM21 is a 3-year feasibility effort to identify viable approaches for an operational performance assessment system for Army enlisted personnel. In this study, the researchers identified the design and content of a self-assessment system (SAS) that would (a) help Soldiers feel confident about testing, (b) inform Soldiers about the junior noncommissioned officer (NCO) promotion system, and (c) familiarize Soldiers with the duties and responsibilities of NCOs. Information about best practices in the field of self-assessment/test preparation including what is done in the other Armed Services, academia, and the test industry was used to develop a prototype SAS that would explore the realm of test preparation functions, actions, and items that a typical Soldier would encounter during this phase. The prototype SAS reflects PerformM21 test parameters; it is web-based, targeted to E4 Soldiers, and focuses on the Army-wide core assessment."--P. i.

Securitisation of Derivatives and Alternative Asset Classes Jul 07 2020
Securitisation has survived the threats that emerged in the aftermath of the collapses of Enron, WorldCom, and Parmalat. Today, global securitisation markets continue to go from strength to strength, particularly as regards the evolution of new synthetic structures and

the application of securitisation technology to fresh asset classes. This Yearbook focuses on the latest innovations in securitisation, including the securitisation of derivatives and alternative asset classes, and also exotic variations on the securitisation of well-established asset classes. Twenty-nine distinguished authors all of them active in the global securitisation markets as advisers, structurers, facilitators, or regulators brilliantly elucidate such topics as the following: synthetic squares as an effective means of arbitrage securitisation; collateralised debt obligations from a ratings perspective; use of, and potential for, synthetic securitisation in Germany and Italy; weather derivatives; use of equity derivatives as alternatives to credit risk; securitisation of alternative asset classes in Japan and the United States; covered bonds in a variety of European jurisdictions; new types of commercial mortgage backed securities; securitisation of non-performing tax receivables as an example of public sector securitisation; and securitisation structures in the Islamic regulatory and legal framework. The complex and sometimes controversial issues of documentation are well covered, as are all significant legal and regulatory issues. Three concluding essays detail the recent changes in accountancy fuelled by perceived abuse of existing regulations, and the revised framework for capital adequacy formulated by the Basel Committee. The Yearbook provides detailed information on the legal structure of innovative securitisations as well as recent developments in the accounting and regulatory treatment of securitisations. For legal advisers, investors, and regulators, there is no more useful guide to current and emerging trends and opportunities in securitisation.
