Foundry Manual Jul 08 2020 This Manual is intended primarily for use by foundry personnel aboard repair ships and tenders. The recommended practices are based on procedures proved workable under Navy conditions and are supplemented by information from industrial sources. The Manual is divided into two general sections. The first section, chapters 1 through 13, contains information of a general nature, such as "How Metals Solidify," "Designing a Casting," "Sands for Molds and Cores," "Gates, Risers, and Chills," and "Description and Operation of Melting Furnaces." Subjects covered in these chapters are generally applicable to all of the metals that may be cast aboard ship. The second section, chapters 14 through 21, contains information on specific types of alloys, such as "Copper-Base Alloys," "Aluminum-Base Alloys," "Cast Iron," and "Steel." Specific melting practices, suggestions for sand mixes, molding practices, gating, and risering are covered in these chapters. This manual has been written with the "how-to-do-it" idea as the principal aim. Discussions as to the "why" of certain procedures have been kept to a minimum. This manual contains information that should result in the production of consistently better castings by repair ship personnel.

Greek and Roman Military Manuals Feb 12 2021 This volume explores the enigmatic primary source known as the ancient military manual. In particular, the volume explores the extent to which these diverse texts constitute a genre (sometimes unsatisfactorily classified as 'technical literature'), and the degree to which they reflect the practice of warfare. With contributions from a diverse group of scholars, the chapters examine military manuals from early Archaic Greece to the Byzantine period, covering a wide range of topics including readership, siege warfare, mercenaries, defeat, textual history, and religion. Coverage includes most of the major contemporary siege manual writers, including Xenophon, Frontinus, Vegetius, and Maurice. Close examination of these texts serves to reveal the complex ways in which ancient Greeks, Romans, and Byzantines sought to understand better, and impose order upon, the seemingly irrational phenomenon known as war. Providing insight into the multifaceted collection of texts that constituted military manuals, this volume is a key resource for students and scholars of warfare and military literature in the classical and Byzantine periods.

Water Aerobics Instructor Training Manual with Specific Exercise Programs Feb 01 2020 Water Aerobics Instructor Training Manual with Specific Exercise Programs by Rob Thomason This book is an instruction manual that gives the potentially new instructor the basic information needed to become certified in water aerobics along with a regime of exercise moves using water dumbbells. The exercise portion gives the potential new instructor the means to begin their own classes after receiving certification using this protocol of water exercises, though there are other exercise moves that can be incorporated that are not listed in this manual. But this manual is more than just about becoming an instructor. Due to his role as a senior health advocate, the author wishes to impart the importance and benefits of water therapy and water wellness which play in the therapeutic aspect of healing and mending of a patient to the overall fitness and maintaining wellness which an individual receives participating in an actual water aerobics class. He also hopes that the medical field recognizes these attributes and supports its usage for the good of their patients. In the "About The Author" section within this manual, the author mentions the trainings and certifications that he has received throughout the various programs that lead him to concentrate on incorporating modifications to various exercise moves so that any individual can join a class and receive basically the same benefits that others get doing the same exercise performed. By having a plan of modified exercises structured within the program, you give those individuals that have trouble keeping up a routine of land exercises (due to any physical limitations), an exercise avenue that is a good fit for their needs and allow them to workout in an overall class structure promoting an atmosphere of safety, camaraderie, and overall fun while getting the physical exercises they need along with the mental challenges that are incorporated within many of the exercises themselves.
