**CP Violation in  $B_s^0 \rightarrow J/\psi \phi$  Decays** 30 2022 This thesis reports on the final measurement of the flavor-mixing phase in decays of strange-bottom mesons  $B_s^0 \rightarrow J/\psi \phi$  and  $B_s^0 \rightarrow \psi(3710) \phi$  mesons performed in high-energy proton-antiproton collisions recorded by the Collider Experiment at Fermilab. Interference occurs between direct CP violation and decays following virtual particle-antiparticle transitions ( $B_s^0 \rightarrow \psi(3710) \phi$ ). The phase difference between transition amplitudes ("mixing phase") is observable and extractable from contributions from non-standard-model particles or interactions that may be very hard to detect otherwise - a fact that makes the precise measurement of the phase one of the most important goals of particle physics. The results presented include a precise determination of the mixing phase and a suite of other important strong phase measurements. All measurements are among the most precise available from a single experiment and provide significantly improved constraints on the phenomenology of new physics interactions.

The Daily Telegraph Guide to the Antique Shops of Britain, 2006/2009 For the past thirty years this chunky, fact-filled book has established itself as the bible for antique collectors and dealers, the indispensable source of addresses, telephone numbers, maps, and specialty indexes. Well-thumbed copies are to be found in countless compartments and on the reference shelves of antiques enthusiasts and professionals both in this country and abroad. We are delighted that The Daily Telegraph has given recognition to the Guide's importance and established position in the marketplace by having its name associated with the title for a third year. A new edition is now available. By its very nature the antiques trade is in a state of constant change: new shops open, old ones close, and dealers move. Every year there are changes to over 1,000 establishments listed and as many as 1,000 dealers open or close. Because the Guide has been produced by the same long-standing and dedicated team of editors, it is uniquely placed for accuracy. As a saver of time and wasted journeys the up-to-date edition is equally essential.
