Pamphlets in Philology and the Humanities May 23 2022

The Englishwoman's Review of Social and Industrial Questions Aug 22 2019 The Englishwoman's Review, which published from 1866 to 1910, participated in and recorded a great change in the range of possibilities open to women. The ideal of the magazine was the idea of the emerging emancipated middle-class woman: economic independence from men, choice of occupation, participation in the male enterprises of commerce and government, access to higher education, admittance to the male professions, particularly medicine, and, of course, the power of suffrage equal to that of men. First published in 1980, this first volume includes an introduction by Janet Horowitz Murray and Myra Stark and issues from 1866 to 1867. The introduction provides an overview of the lifespan of the publication, the people involved in its production and the issues it addressed. This work will be an invaluable resource to those studying nineteenth and early twentieth-century feminism and the women's movement in Britain.

Measuring Public Attitudes Toward Natural Resource Issues May 31 2020 A method to obtain quantitative information on public attitudes toward natural resource issues is described.1 The quantification depends on the structure of the entire survey instrument as well as on individual items in the survey. Items are designed and organized to facilitate (1) the summarizing of measured attitudes toward very complex resource issues, and (2) meaningful comparisons of the summary attitudinal measures to other quantified impacts -- economic and physical -- for policy analysis. A U.S. Department of Agriculture and U.S. Fish and Wildlife Service study of the costs and benefits of coyote control illustrates the quantification process.
