**Fundamentals of Wearable Computers and Augmented Reality** Feb 10 2021 Data will not help you if you can't see it where you need it. Or can't collect it where you need it. Upon these principles, wearable technology was born. And although smart watches and fitness trackers have become almost ubiquitous, with in-body sensors on the horizon, the future applications of wearable computers hold so much more. A trusted reference for almost 15 years, Fundamentals of Wearable Computers and Augmented Reality goes beyond smart clothing to explore user interface design issues specific to wearable tech and areas in which it can be applied. Upon its initial publication, the first edition almost instantly became a trusted reference, setting the stage for the coming decade, in which the explosion in research and applications of wearable computers and augmented reality occurred. Written by expert researchers and teachers, each chapter in the second edition has been revised and updated to reflect advances in the field and provide fundamental knowledge on each topic, solidifying the book's reputation as a valuable technical resource as well as a textbook for augmented reality and ubiquitous computing courses. New Chapters in the Second Edition Explore: Haptics Visual displays Use of augmented reality for surgery and manufacturing Technical issues of image registration and tracking Augmenting the environment with wearable audio interfaces Use of augmented reality in preserving cultural heritage Human-computer interaction and augmented reality technology Spatialized sound and augmented reality Augmented reality and robotics Computational clothing From a technology perspective, much of what is happening now with wearables and augmented reality would not have been possible even five years ago. In the fourteen years since the first edition burst on the scene, the capabilities and applications of both technologies are orders of magnitude faster, smaller, and cheaper. Yet the book's overarching mission remains the same: to supply the fundamental information and basic knowledge about the design and use of wearable computers and augmented reality with the goal of enhancing people's lives.

**Rez Life** Aug 26 2019 A prize-winning writer offers "an affecting portrait of his childhood home, Leech Lake Indian Reservation, and his people, the Ojibwe" (The New York Times). A member of the Ojibwe of northern Minnesota, David Treuer grew up on Leech Lake Reservation, but was educated in mainstream America. Exploring crime and poverty, casinos and wealth, and the preservation of native language and culture, *Rez Life* is a strikingly original blend of history, memoir, and journalism, a must read for anyone interested in the Native American story. With authoritative research and reportage, he illuminates issues of sovereignty, treaty rights, and natural-resource conservation. He traces the policies that have disenfranchised and exploited Native Americans, exposing the tension that marks the historical relationship between the US government and the Native American population. Ultimately, through the eyes of students, teachers, government administrators, lawyers, and tribal court judges, he shows how casinos, tribal government, and the Bureau of Indian Affairs have transformed the landscape of modern Native American life. "Treuer's account reads like a novel, brimming with characters, living and dead, who bring his tribe's history to life." —Booklist "Important in the way Dee Brown's *Bury My Heart at Wounded Knee* was when it came out in 1970, deeply moving readers as it schooled them about Indian history in a way nothing else had." —Minneapolis Star-Tribune "[A] poignant, penetrating blend of memoir and history." —People

**Blood and Treasure** Nov 09 2020 The Instant New York Times Bestseller National Bestseller "[The] authors' finest work to date." —Wall Street Journal The explosive true saga of the legendary figure Daniel Boone and the bloody struggle for America's frontier by two bestselling authors at the height of their writing power—Bob Drury and Tom Clavin. It is the mid-eighteenth century, and in the thirteen colonies founded by Great Britain, anxious colonists desperate to conquer and settle North America's "First Frontier" beyond the Appalachian Mountains commence a series of bloody battles. These violent conflicts are waged against the Native American tribes whose lands they covet, the French, and the mother country itself in an American Revolution destined to reverberate around the world. This is the setting of *Blood and Treasure*, and the guide to this epic narrative is America's first and arguably greatest pathfinder, Daniel Boone—not the coonskin cap-wearing caricature of popular culture but the flesh-and-blood frontiersman and Revolutionary War hero whose explorations into the forested frontier beyond the great mountains would become the stuff of legend. Now, thanks to painstaking research by two award-winning authors, the story of the brutal birth of the United States is told through the eyes of both the ordinary and larger-than-life men and women who witnessed it. This fast-paced and fiery narrative, fueled by contemporary diaries and journals, newspaper reports, and eyewitness accounts, is a stirring chronicle of the conflict over America's "First Frontier" that places the reader at the center of this remarkable epoch and its gripping tales of courage and sacrifice.

**Radical Technologies** Jun 24 2019 A field manual to the technologies that are transforming our lives Everywhere we turn, a startling new device promises to transfigure our lives. But at what cost? In this urgent and revelatory excavation of our Information Age, leading technology thinker Adam Greenfield forces us to reconsider our relationship with the networked objects, services and spaces that define us. It is time to re-evaluate the Silicon Valley consensus determining the future. We already depend on the smartphone to navigate every aspect of our existence. We're told that innovations—from augmented-reality interfaces and virtual assistants to autonomous delivery drones and self-driving cars—will make life easier, more convenient and more productive. 3D printing promises unprecedented control over the form and distribution of matter, while the blockchain stands to revolutionize everything from the recording and exchange of value to the way we organize the mundane realities of the day to day. And, all the while, fiendishly complex algorithms are operating quietly in the background, reshaping the economy, transforming the fundamental terms of our politics and even redefining what it means to be human. Having successfully colonized everyday life, these radical technologies are now conditioning the choices available to us in the years to come. How do they work? What challenges do they present to us, as individuals and societies? Who benefits from their adoption? In answering these questions, Greenfield's timely guide clarifies the scale and nature of the crisis we now confront —and offers ways to reclaim our stake in the future.

**Electric Eden** Oct 21 2021 A Kirkus Reviews Best Nonfiction of 2011 title In the late 1960s, with popular culture hurtling forward on the sounds of rock music, some brave musicians looked back instead, trying to recover the lost treasures of English roots music and update them for the new age. The records of Fairport Convention, Pentangle, Steeleye Span, and Nick Drake are known as "folk rock" today, but Rob Young's epic, electrifying book makes clear that those musicians led a decades-long quest to recover English music—and with it, the ancient ardor for mysticism and paganism, for craftsmanship and communal living. It is a commonplace that rock and R&B came out of the folk and blues revivals of the early 1960s, and Young shows, through enchanting storytelling and brilliant commentary, that a similar revival in England inspired the Beatles and Pink Floyd, Led Zeppelin and Traffic, Kate Bush and Talk Talk. Folklorists notated old songs and dances. Marxists put folk music forward as the true voice of the people. Composers like Benjamin Britten and Ralph Vaughan Williams devised rich neo-traditional pageantry. Today, the pioneers of the "acid folk" movement see this music as a model for their own. *Electric Eden* is that rare book which has something truly new to say about popular music, and like Greil Marcus's *Lipstick Traces*, it uses music to connect the dots in a thrilling story of art and society, of tradition and wild, idiosyncratic creativity.

**The Story of the Jewish People** May 16 2021 A history of Judaism written in letters from historian Martin Gilbert to his acquaintance in India, who wants to learn more about her ancestry. At her ninetieth birthday celebration in New Delhi, "Auntie Fori" revealed to her longtime acquaintance, Sir Martin Gilbert, that she was not of Indian birth but actually Hungarian—and Jewish. She did not know what this Jewish identity involved, historically or spiritually, and asked him to enlighten her. In response, Sir Martin embarked on the series of letters that have been gathered to form this book, shaping each one as a concise, individually formed story. He presents Jewish history as the narrative expression—the timeline—of the Jewish faith, and the faith as it is informed by the history. In Sir Martin's hands, these stories are rich in incident and achievement, starting with Adam and Eve through the Biblical and post-Biblical periods, to the long history of the Jews in the Diaspora, and ending with an unexpected visit to an outpost of Jewry in Anchorage, Alaska. Ranging through almost every country in the world—including China and India—he maintains a chronological structure, weaving in the history of other peoples and faiths, to give Auntie Fori, and us, a sense of the larger stage on which Jewish history has played out. "Compact, breezy, and thoroughly enjoyable . . . For those, like Auntie Fori, hoping to understand the Jewish past and present, this book is a treasure." —Booklist

**Rags and Bones** Apr 14 2021 Contributions by Joshua Coleman, Christine Hand Jones, Kevin C. Neece, Charlotte Pence, George Plasketes, Jeffrey Scholes, Jeff Sellars, Toby Thompson, and Jude Warne After performing with Ronnie Hawkins as the Hawks (1957–1964), The Band (Rick Danko, Garth Hudson, Richard Manuel, Robbie Robertson, and Levon Helm) eventually rose to fame in the sixties as backing musicians for Bob Dylan. This collaboration with Dylan presented the group with a chance to expand musically and strike out on their own. The Band's fusion of rock, country, soul, and blues music—all tinged with a southern flavor and musical adventurousness—created a unique soundscape. The combined use of multiple instruments, complex song structures, and poetic lyrics required attentive listening and a sophisticated interpretive framework. It is no surprise, then, that they soon grew to be one of the biggest bands of their era. In *Rags and Bones: An Exploration of The Band*, scholars and musicians take a broad, multidisciplinary approach to The Band and their music, allowing for examination through sociological, historical, political, religious, technological, cultural, and philosophical means. Each contributor approaches The Band from their field of interest, offering a wide range of investigations into The Band's music and influence. Commercially successful and critically lauded, The Band created a paradoxically mythic and hauntingly realistic lyrical landscape for their songs—and their musicianship enlarged this detailed landscape. This collection offers a rounded examination, allowing the multifaceted music and work of The Band to be appreciated by audiences old and new.

*Blood and Earth* Dec 31 2019 For readers of such crusading works of nonfiction as Katherine Boo's *Beyond the Beautiful Forever*s and Tracy Kidder's *Mountains Beyond Mountains* comes a powerful and captivating examination of two entwined global crises: environmental destruction and human trafficking—and an inspiring, bold plan for how we can solve them. A leading expert on modern-day slavery, Kevin Bales has traveled to some of the world's most dangerous places documenting and battling human trafficking. In the course of his reporting, Bales began to notice a pattern emerging: Where slavery existed, so did massive, unchecked environmental destruction. But why? Bales set off to find the answer in a fascinating and moving journey that took him into the lives of modern-day slaves and along a supply chain that leads directly to the cellphones in our pockets. What he discovered is that even as it destroys individuals, families, and communities, new forms of slavery that proliferate in the world's lawless zones also pose a grave threat to the environment. Simply put, modern-day slavery is destroying the planet. The product of seven years of travel and research, *Blood and Earth* brings us dramatic stories from the world's most beautiful and tragic places, the environmental and human-rights hotspots where this crisis is concentrated. But it also tells the stories of some of the most common products we all consume—from computers to shrimp to jewelry—whose origins are found in these same places. *Blood and Earth* calls on us to recognize the grievous harm we have done to one another, put an end to it, and recommit to repairing the world. This is a clear-eyed and inspiring book that suggests how we can begin the work of healing humanity and the planet we share. Praise for *Blood and Earth* “A heart-wrenching narrative . . . Weaving together interviews, history, and statistics, the author shines a light on how the poverty, chaos, wars, and government corruption create the perfect storm where slavery flourishes and environmental destruction follows. . . . A clear-eyed account of man's inhumanity to man and Earth. Read it to get informed, and then take action.”—Kirkus Reviews (starred review) “[An] exposé of the global economy's ‘deadly dance’ between slavery and environmental disaster . . . Based on extensive travels through eastern Congo's mineral mines, Bangladeshi fisheries, Ghanaian gold mines, and Brazilian forests, Bales reveals the appalling truth in graphic detail. . . . Readers will be deeply disturbed to learn how the links connecting slavery, environmental issues, and modern convenience are forged.”—Publishers Weekly “This well-researched and vivid book studies the connection between slavery and environmental destruction, and what it will take to end both.”—Shelf Awareness (starred review) “This is a remarkable book, demonstrating once more the deep links between the ongoing degradation of the planet and the ongoing degradation of its most vulnerable people. It's a bracing reminder that a mentality that allows throwaway people also allows a throwaway earth.”—Bill McKibben, author of *Eaarth: Making a Life on a Tough New Planet*

*Black Passports* Jun 16 2021 A resource guide that uses African American memoir to address a variety of issues related to mentoring and curriculum development. In this resource guide for fostering youth empowerment, Stephanie Y. Evans offers creative commentary on two hundred autobiographies that contain African American travel memoirs of places around the world. The narratives are by such well-known figures as Frederick Douglass, W. E. B. Du Bois, Billie Holiday, Maya Angelou, Malcolm X, James Baldwin, Muhammad Ali, Richard Pryor, Angela Davis, Condoleezza Rice, and President Barack Obama, as well as by many lesser-known travelers. The book addresses a variety of issues related to mentoring and curriculum development. It serves as a tool for “literary mentoring,” where students of all ages can gain knowledge and wisdom from texts in the same way achieved by one-on-one mentoring, and it also provides ideas for incorporating these memoirs into lessons on history, geography, vocabulary, and writing. Focusing on four main mentoring themes—life, school, work, and cultural exchange—Evans encourages readers to comb the texts for models of how to manage attitudes, behaviors, and choices in order to be successful in transnational settings. “This book provides a new and refreshing way to think about Black youth and issues of empowerment. It will be a useful tool for teachers, parents, scholars, and community organizers, leaders, and activists.” — Valerie Grim, Indiana University Bloomington
