Software Technologies for Embedded and Ubiquitous Systems (SEUS) 2022 The 7th IFIP Workshop on Software Technologies for Future Embedded and Ubiquitous Systems (SEUS) followed on the success of six previous editions in Capri (2008), Santorini, Greece (2007), Gyeongju, Korea (2006), Seattle, USA (2005), Vienna, Austria (2004), and Hokodate, Japan (2003), establishing SEUS as one of the emerging workshops in the field of embedded and ubiquitous systems. The tradition of fostering cross-community scientific excellence and establishing strong links between research and industry. The fields of both embedded computing and ubiquitous systems have seen considerable growth in the past few years. Given the advances in these fields, and also those in the areas of distributed computing, sensor networks, middleware, etc., the area of ubiquitous embedded computing is now being envisioned as the way of the future. Ubiquitous technologies that will arise in support of ubiquitous embedded computing will undoubtedly need to address a variety of issues, including dependability, real-time, human-computer interaction, autonomy, resource constraints, and requirements pose a challenge to the research community. The purpose of SEUS 2009 was to bring together researchers and practitioners with an interest in advancing the state of the art and the state of practice in this emerging area, fostering new ideas, collaborations and technologies. SEUS 2009 would not have been possible without the effort of many people.
