The Education of d/Deaf and Hard of Hearing Children Jul 25 2019 A significant number of d/Deaf and hard of hearing (d/Dhh) children and adolescents experience challenges in acquiring a functional level of English language and literacy skills in the United States (and elsewhere). To provide an understanding of this issue, this book explores the theoretical underpinnings and synthesizes major research findings. It also covers critical controversial areas such as the use of assistive hearing devices, language, and literacy assessments, and inclusion. Although the targeted population is children and adolescents who are d/Dhh, contributors found it necessary to apply our understanding of the development of English in other populations of struggling readers and writers such as children with language or literacy disabilities and those for whom English is not the home language. Collectively, this information should assist scholars in conducting further research and enable educators to develop general instructional guidelines and strategies to improve the language and literacy levels of d/Dhh students. It is clear that there is not a 'one-size-fits-all' concept, but, rather, research and instruction should be differentiated to meet the needs of d/Dhh students. It is our hope that this book stimulates further theorizing and research and, most importantly, offers evidence- and reason-based practices for improving language and literacy abilities of d/Dhh students.

[Powerful Learning Communities](#) Apr 25 2022 Learning communities have been demonstrated to dramatically improve student outcomes by engaging students in their learning.

This book constitutes a comprehensive guide for readers who want a broad strategic view of learning communities, enabling them to identify which type of LC best meets the learning needs of their students, and the context and mission of their institution. It also provides the tools for planning, designing and implementing what the authors define as "powerful" LCs, and for understanding the assessment implications of their decisions. The potential power of LCs is realized through effective facilitation, appropriate team-building activities, linkages, planning, and active collaboration that promotes learning of the group and the individual group members - all of which topics are covered in this volume. This book is organized around the three themes of setting the stage, designing an LC, and building or enhancing a powerful LC, and covers three types of learning communities - student, professional (faculty, staff), and institutional LCs concerned with student learning - providing a range of tools and forms to facilitate planning. The authors also address designing and maintaining hybrid and virtual LCs. This book is intended as a practical resource for anyone at any level in higher education who wants to champion, develop or redesign student or professional LCs, or even explore broader initiatives to develop their institution into a "learning organization". Administrators in academic and student affairs will find guidance for setting appropriate policies and allocating resources. The book may also serve as a textbook for graduate courses in institutional leadership and policy studies, curriculum and instruction, student affairs, or assessment/evaluation.

Commissioner of Patents Annual Report Sep 26 2019

The Book of the Heart Jan 29 2020 In today's increasingly electronic world, we say our personality traits are "hard-wired" and we "replay" our memories. But we use a different metaphor when we speak of someone "reading" another's mind or a desire to "turn over a new leaf"—these phrases refer to the "book of the self," an idea that dates from the beginnings of Western culture. Eric Jager traces the history and psychology of the self-as-text concept from antiquity to the modern day. He focuses especially on the Middle Ages, when the metaphor of a "book of the heart" modeled on the manuscript codex attained its most vivid expressions in literature and art. For instance, medieval saints' legends tell of martyrs whose hearts recorded divine inscriptions; lyrics and romances feature lovers whose hearts are inscribed with their passion; paintings depict hearts as books; and medieval scribes even produced manuscript codices shaped like hearts. "The Book of the Heart provides a fresh perspective on the influence of the book as artifact on our language and culture. Reading this book broadens our appreciation of the relationship between things and ideas."—Henry Petroski, author of The Book on the Bookshelf

Math in Society Jul 17 2021 Math in Society is a survey of contemporary mathematical topics, appropriate for a college-level topics course for liberal arts major, or as a general quantitative reasoning course. This book is an open textbook: it can be read free online at <http://www.opentextbookstore.com/mathinsociety/>. Editable versions of the chapters are available as well.

Multiracial Experiences in Higher Education Nov 28 2019 Recipient of the 2021 Innovation Award of The Multiracial Network (MRN) In the last Census, over 9 million

people - nearly 3% of the population - identified themselves as of two or more races. The proportion of college students who identify as Multiracial is somewhat higher,

and growing. Although increasing at a slightly slower rate, Multiracial faculty and staff are also teaching and working on campuses in greater numbers. Together,

Multiracial people from diverse backgrounds and in various roles are influencing college and university culture, practices, and climate. This book centers the

experiences of Multiracial people, those individuals claiming heritage and membership in two or more (mono)racial groups and/or identifying with a Multiracial term.

These terms include the broader biracial, multiethnic, and mixed, or more specific terms like Blasian and Mexipino. In addressing the recurring experiences of

inclusion, exclusion, affirmation, and challenges that they encounter, the contributors identify the multiple sites in higher education that affect personal perceptions

of self, belonging, rejection, and resilience: describe strategies they utilized to support themselves or other Multiracial people at their institutions; and to

advocate for greater awareness of Multiracial issues and a commitment to institutional change. In covering an array of Multiracial experiences, the book brings together

a range of voices, social identities (including race), ages, perspectives, and approaches. The chapter authors present a multiplicity of views because, as the book

exemplifies, multiracial people are not a monolithic group, nor are their issues and needs universal to all. The book opens by outlining the literature and theoretical

frameworks that provide context and foundations for the chapters that follow. It then presents a range of first person narratives - reflecting the experiences of

students, faculty, and staff - that highlight navigating to and through higher education from diverse standpoints and positionalities. The final section offers multiple

strategies and applied methods that can be used to enhance Multiracial inclusion through research, curriculum, and practice. The editors conclude with recommendations

for future scholarship and practice. This book invites Multiracial readers, their allies, and those people who interact with and influence the daily lives of

Multiracial people to explore issues of identity and self-care, build coalitions on campus, and advocate for change. For administrators, student affairs personnel, and

anyone concerned with diversity on campus, it opens a window on a growing population with whom they may be unfamiliar, mis-categorize, or overlook, and on the need to

change systems and structures to address their full inclusion and unveil their full impact. Contributors: e alexander Rebecca Cepeda Lisa Combs Wei Ming Dariosits Nick
